

Cargo DryPak

Cargo DryPak is a specially formulated desiccant product designed to lower the dew point inside shipping and storage containers. By lowering the dew point, Cargo DryPak protects cargo from moisture damage while goods are in transport.

Available in Two Sizes:

- 500 gram (30 per box)
- 1,500 gram (10 per box)

* One box protects one 20' container

Cargo DryPak has many advantages:

- Ship goods without the threat of "Container Rain"
- Inhibits the formation of mold, mildew, rust and corrosion
- Absorbs up to 100% of its weight in moisture
- Provides 50 days or more of moisture protection
- Prevents weak cartons and loose labels caused by moisture
- Environmentally safe and can be disposed of as normal waste

Cargo DryPak has many applications:

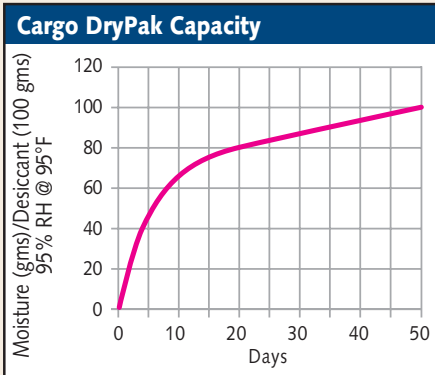

- Ocean, truck, rail & air shipping containers
- Protection of textiles, leather goods, shoes, furniture, food products, grains, feeds, pet food, canned goods and bottled products
- Protection of industrial products such as auto parts, machinery, metal products, paper and cardboard boxes
- Ideal for boats & RV's as well as long term storage applications

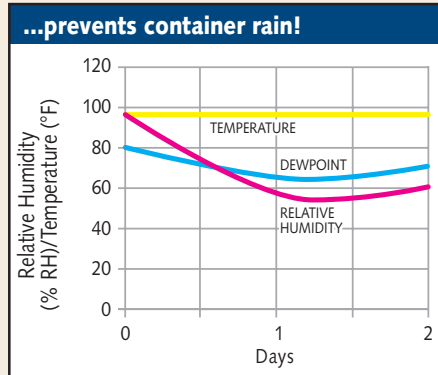

Part Number	Grams	Dimensions	Quantity	Container	Weight
02EF35A22	500	10.5" x 5.5"	30	Carton	37
03EI35S22	1,500	13.5" x 7"	10	Carton	37

Carton Size: 19" x 12.5" x 9.5"

Pallet Quantity: 42

This graph depicts Cargo DryPak absorbing over 100% of its weight in moisture. Cargo DryPak will continue to absorb moisture for over 50 days inside standard shipping containers.

This graph illustrates Cargo DryPak reducing the dewpoint and relative humidity inside a standard shipping container at (95% RH@95°F). By reducing the dewpoint, Cargo DryPak prevents condensation from forming for over 50 days.

To illustrate Cargo DryPak's effectiveness, Desiccare offers its customers our onboard climate monitoring computers to accompany their shipments in order to measure the humidity, temperature and dewpoint throughout the voyage. This information is downloaded into a chart format in order to give our customers a graphical depiction of the climactic changes with and without the use of Cargo DryPak.

Leave moisture problems behind with Cargo DryPak

The early design of an effective packaging system reduces long-term moisture damage when used in conjunction with Cargo DryPak. Desiccare's trained personnel welcome the opportunity to assist customers in developing the correct packaging solutions.
