Cloth Wipers	Chamois

Bonded Cellulose

HOW DO YOU KNOW IF THE WIPER YOU ARE USING IS THE BEST POSSIBLE CHOICE FOR YOUR APPLICATION?

There are many different technologies, manufacturing techniques and fiber compositions used to produce disposable wiping towels.

Each of the manufacturing processes and fiber types yield unique characteristics. Some things to consider are size, packaging, directional strength, weight, loft, feel, absorption capacity, absorption rate, abrasiveness, solvent compatibility and certainly value.

Most wiper users have not been exposed to all their possible choices. Please call our technical staff to discuss your special requirements with information about your application and how you need the wipers to perform.

Sorbent Products

Recycled Wiping Cloths

CUSTOMERS SAY THIS IS THE BEST THEY'VE EVER USED

Multi-Purpose Wet Wipers

Orange Peels multi-purpose pre-moistened wipers have a powerful orange oil formula that will quickly clean metals, laminates, fiberglass, machinery, concrete and tools.

The unique formula will cut through grease, oil, paint, sealants, tar, wax and most graffiti. Orange Peels multi-purpose wipers formula also contains lanolin and vitamin-E so they are safe on skin. Scrub clean with the orange side of the wiper then use the white side for a final wipe.
